Now Proven—BETTER STANDS—LARGER YIELDS Archias' "CHEMICAL-COATED" SEEDS

Extra Crop Insurance At Very Little Cost—Order All Your Farm Seed "Chemical-Coated"

The greatest development in Farm Seed history. Experiment Stations have, after much research, found seed treatment beneficial to small legumes and grasses as it has been for seed corn. Our "Chemical Coated" process is the very latest — using the newest, improved Slurry Treaters—for uniform, dust free, safe coverage. The coating material, DuPont's latest development with growth stimulant added, is highly effective in destroying the growth of fungi responsible for seed decay and damping-off and root rots — the coating protects the seed and seedlings during the period of germination and emergence. This means better stands—healthier plants and more profitable yields. This extra crop insurance costs very little, especially when used on your higher priced seeds.

LOW COST OF THIS SERVICE

Because "Chemical Coating" is new, and we want you to decide whether to use it or not we do not price our Farm Seeds (with few exceptions) with this treatment applied, but give you the cost separately. To find the cost of "Chemical Coating" add the following to your order for treatment. Because we sell only the very highest quality

ABOUT "CHEMICAL COATED" CERTIFIED SEED

To Chemical Coat Seed it is necessary that the bag seals be broken and the seed run through the Slurry Treater. When you ask for "Chemical Coated" for your Certified seed remember that the seals will necessarily be removed and the seed will no longer be "Certified Sealed."

Farm Seed, we believe you will find our prices lower than most other seedsmen offering quality seeds. Be sure to mark your order sheet for "Chemical Coating" and tell us which lots you want treated.

Most Clovers, Lespedeza, Alfalfa, Oats, Beans, Sudan and Similar Size Seeds.

\$1.25 per 100 lbs., extra

Grasses, Timothy, Brome, Orchard, Fescue, Ladino, Red Top and Similar Seeds.

\$1.75 per 100 lbs., extra
